FRENCH	● ● ● ● ●
ENGLISH	● ● ● ● ●
SPANISH	● ● ● ● ●

### PROJECTS & PORTFOLIO

#### Full Stack Nanodegree - Udacity

As I am working myself through this course I have created a movie trailer website and a Swiss-system tournament app in Python. I'm currently working on a restaurant listing app that is using Oauth2 for authentication, and I can't wait for what's in store next.

#### JeeCee Int.

This company represented a multitude of challenges, they run several businesses that each needed rebranding and overhaul of marketing strategies. JeeCee solicited my services for two multilingual responsive websites and an e-commerce store that they can easily maintain themselves. They also required many reoccurring print designs for niche specific magazines and branded graphics for printing.

Addicted to web design I enjoy creating engaging UI/UX applications for my clients and their users. I love learning new technologies and using them in my projects. My goal is to continue to grow as a developer and work with a great team of people with diverse skill sets and creatively use technology to solve difficult problems.

THANKS FOR YOUR TIME
